

TWENTY FIVE YEARS AGO

[JANUARY, 1975]

In "Message from the Dean," Stanely M. Aronson, MD, discussed "CME Resources for the Practicing Rhode Island Physician." The Rhode Island Health Science Education Council, Brown University, and the Rhode Island Medical Society had formed an integrative unit for CME. Its Coordinating Committee had begun to hire staff and set up an office.

Hannibal Hamlin, MD, in "A Look at Romanian Health Care Organization-Education-Practice," commented on his federal HEW-funded trip. He found "...despite conflicting political ideologies and major societal differences over health-care organization and delivery in [Romania] and US, the majority of [professionals]...seem committed to what could be accepted as a Galenic axiom. *Sana aegros quam optime* (Heal

the sick as best you can.)

Chong Kong, a Brown University medical student, contributed "Cystinosis: Review," a discussion of intracellular deposits resulting in renal damage and ultimately in uremia, "a rare hereditary disorder."

Sewell J. Kahn, MD, contributed "The Nephrotic Syndrome," discussing the diagnosis, presentation, and therapy.

An editorial ("Health Care Crisis") cautioned that "Radical change is long overdue" for malpractice insurance. In New York state, one insurer withdrew from the market, and a new one wanted a rate increase of 196.8%, "effective immediately." The editorial noted, "It is possible for a new orthopedic surgeon to be faced with paying more insurance premiums in his first year than he could earn in his first few years of practice." (The New York State Insurance Commissioner had suspended the new rates, pending a hearing.) The problem was looming in 7 other states.
